EDUCATION

Army Institute of Technology, Pune, Maharashtra

B.E. in Information Technology — CGPA: 8.42 July 2024 – Present

Class XII: 89.8% | Class X: 94.96%

POSITIONS OF RESPONSIBILITY

Joint Secretary — Technical Club

July 2025 – Present

- Coordinated technical initiatives and collaborated on student-focused development activities.
- Assisted in organizing technical events, student engagement activities, and development-oriented club initiatives.
- Worked closely with teams on planning, coordination, and execution of technical programs.

TECHNICAL SKILLS

- **Programming & Problem Solving:** C++, JavaScript, TypeScript (Working Knowledge), Data Structures & Algorithms
- **Frontend:** HTML, CSS, React.js, Next.js, Tailwind CSS, Responsive Design
- **Backend:** Node.js, Express.js, REST APIs, JWT Authentication, WebSockets
- **Databases & Deployment:** MongoDB, Railway, Vercel
- **Maps & Real-Time Systems:** Leaflet.js, Geolocation APIs, Route Rendering, Coordinate Handling, Distance & Time Estimation
- **Tools & Platforms:** Git, GitHub, Docker, Postman, npm, Vite, VS Code

PROJECTS & EXPERIENCE

Velocity — Uber-Inspired Ride Booking & Navigation Platform

React.js · Node.js · Express.js · MongoDB · Leaflet.js

- Developed Velocity, an Uber-inspired full-stack ride-booking and navigation platform focused on real-time movement and location-based workflows.
- Implemented interactive maps using Leaflet.js with coordinate-based pickup and destination selection.
- Built route visualization and distance/time estimation features using geolocation and routing logic.

- Designed responsive frontend interfaces using React.js and Tailwind CSS for seamless ride-booking workflows.
- Developed scalable backend APIs using Node.js and Express.js for authentication, trip handling, and ride management.
- Structured modular REST API architecture to improve maintainability and scalability.
- Managed the complete solo development lifecycle including architecture, development, debugging, deployment, and version control.
- Deployed frontend and backend services using Vercel and Railway with Git-based workflows.
- Completed the project independently within 17–20 days.
- Live Demo: <https://uberwebsite-dusky.vercel.app/>
- Repository: <https://github.com/pratik-galave/uberwebsite.git>

DevConnect — Developer Social Platform

MERN Stack · JWT Authentication · MongoDB

- Built a full-stack developer networking platform where users can create profiles, share posts, and interact with other developers.
- Implemented secure JWT-based authentication and protected routing.
- Developed scalable REST APIs and MongoDB schemas for efficient data management.
- Designed reusable React components with responsive UI architecture.

Realtime Chat Application

MERN Stack · WebSockets · Real-Time Communication

- Developed a real-time messaging application supporting private and group communication.
- Implemented socket-based live messaging workflows and synchronized frontend state updates.
- Built responsive React interfaces optimized for seamless user interaction.

TaskFlow — Productivity & Task Management Platform

React.js · Node.js · REST APIs

- Created a task management application with CRUD operations, deadline tracking, and progress workflows.
- Developed RESTful backend services and responsive dashboard interfaces.
- Focused on usability, clean component architecture, and scalable frontend structure.

COMPETITIVE PROGRAMMING & ACHIEVEMENTS

- Solved 260+ Data Structures & Algorithms problems on LeetCode.
- CodeChef — 3★ Rating.
- Codeforces — Rating ~990.
- Strong foundation in algorithms, problem solving, and scalable application logic.
